Corporate Presentation
August 2011
Evraz Group in Brief

- One of the largest vertically integrated steel and mining companies in the world
- Leader in the Russian and CIS construction and railway products markets
- A lead player in the European and North American plate and large diameter pipe markets
- One of the world’s lowest cost steel producers due to production efficiency and high level of vertical integration
- One of the leading producers in the global vanadium market
- In 2010, EVRAZ produced 16.3 million tonnes of crude steel and sold 15.5 million tonnes of steel rolled products
- 2010 consolidated revenue amounted to US$13.4 billion; EBITDA was US$2.4 billion
- GDRs listed on London Stock Exchange; market capitalisation approx. US$12 billion

* Adjusted EBITDA represents profit from operations plus depreciation and amortisation, impairment of assets, revaluation deficit, foreign exchange loss (gain) and loss (gain) on disposal of PP&E. See appendix on p.30 for reconciliation of profit (loss) from operations to Adjusted EBITDA

** As at the end of the reporting period

*** Here and throughout this presentation segment sales data refers to external sales unless otherwise stated
2010 Financial Highlights

- Significant growth in revenues and EBITDA as a result of strong market recovery
- Both prices and volumes contributed to revenue growth
- Steel products remain the predominant source of revenue, but EBITDA is increasingly generated by mining segment due to higher relative growth of iron ore and coking coal prices
## 1Q 2011 Performance

- **1Q11 Steel Segment** revenue amounted to US$3,128 million, Mining Segment - US$262 million, Vanadium Segment – US$133 million and Other revenues reached US$371 million (incl. US$83 mln from rendering of services).
- Iron ore sales (incl. intersegment shipments) totalled 5.2 mt vs 4.2mt in 1Q10.
- Coal sales (incl. intersegment shipments) were 2.1 mt, including 0.6 mt of raw coking coal and 1.2 mt of coking coal concentrate, compared to 2.5mt, 0.9 mt and 0.9 mt respectively.

2Q 2011 Operational Results

- Steel product mix shifted more in favour of finished goods
- Prices for almost all product groups increased as a result of stronger demand and higher raw materials prices
- Coking coal production decreased compared to the previous quarter due to the ongoing operational issues at some of the Yuzhkuzbassugol mines
Group Cost Dynamics

- EVRAZ’s high level of vertical integration into iron ore and coking coal helped to partially mitigate negative impact of escalating prices of input materials on steelmakers’ costs
- Consolidated cost is approx. 50% Rouble denominated. Rouble appreciation largely responsible for cash cost increase in 2009
- Increased costs in 2010 reflected mostly growth of non-controllable costs, such as raw materials and utilities

*Source: Management accounts

EVRAZ's high level of vertical integration into iron ore and coking coal helped to partially mitigate negative impact of escalating prices of input materials on steelmakers’ costs. Consolidated cost is approx. 50% Rouble denominated. Rouble appreciation largely responsible for cash cost increase in 2009. Increased costs in 2010 reflected mostly growth of non-controllable costs, such as raw materials and utilities.
○ Positive free cash flow generation despite significant CAPEX
○ Increase in working capital due to higher level of activity and higher prices

*Free cash flow comprises cash flows from operating activities less interest paid, covenant reset charges and cash flows from investing activities
Liquidity and Debt Maturity Profile

Total debt of approx. US$7.8 billion as of 31 March 2011

Refinancing steps significantly strengthened liquidity profile and demonstrated EVRAZ’s ready access to debt markets:

- In April 2011, EVRAZ issued US$850 million bonds due 2018 at an interest rate of 6.75%, the lowest ever coupon for EVRAZ Eurobond issues
- Part of the proceeds from the issue was used to purchase approx. US$622 million in aggregate principal amount of the outstanding bonds due 2013
- In June, Evraz issued a 20 billion 5-year rouble bond (approx. US$710 million) at 8.40%
- In June, Evraz incentivised conversion of US$648 million in principal amount of convertible bonds due 2014

EVRAZ ratings upgraded: S&P to B+, Stable; Moody’s to B1, Positive; Fitch to BB-, Positive

Refinancing remains a priority; targeting net debt/EBITDA ratio below 2 in the medium term

Note. Debt for covenant compliance is calculated differently from IFRS

Source: Management accounts
Steel: CIS

- Full utilisation of Russian and Ukrainian steelmaking capacities maintained throughout the year
- In 2010 domestic steel sales accounted for 58% of EVRAZ’s Russian and Ukrainian mills’ steel sales compared to 44% in 2009, reflecting improving demand in the CIS market and the shift to sales of higher margin products
- Market share increased in domestic sales through own distributors
- Prices of key products strengthened in response to demand recovery and growth in raw material prices
- EVRAZ reached long-term agreement with Russian Railways in 2H 2010 to supply rails at price formula based on the scrap price, thereby protecting segment’s margins going forward

Steel: North America

- Gradual recovery in demand driven by economic improvements and the onset of regional governments' infrastructure spending
- Shale gas exploration projects generate strong demand for small diameter pipe
- Sales volumes of steel products increased by 26%
- Flat-rolled steel volumes increased by 31%; tubular products by 40%
- Pricing of steel products generally follows scrap price trends

</tbody>
</table>
Steel: Europe, South Africa

- EVRAZ’s European mills sales volumes increased by 36%
- Flat-rolled product sales registered 35% volume rise and 61% increase, largely reflecting improvement in the European market
- The shutdown of steelmaking at EVRAZ Vitkovice Steel in 2H 2010 had no material economic impact on EVRAZ’s production volumes and costs
- Sales of EVRAZ Highveld’s steel products were effectively flat as domestic demand in the South African market remained weak

Steel Product Sales Volumes, European Operations

Steel Product Sales Volumes, South African Operations
**Coal Mining**

- Volumes of coking coal mined in 1H 2010 decreased due to lengthy repositioning of longwall at Ulyanovskaya mine.
- 3Q 2010 volumes were also depressed due to the implementation of additional workplace safety measures; 4Q 2010 volumes returning to normalised levels.
- Cash cost in 2Q-3Q 2010 higher due to fixed cost impact on lower volumes.
- Coking coal self-coverage to increase over the next three years by developing existing deposits and reducing coking coal consumption through the implementation of pulverised coal injection technology.

---

</tbody>
</table>

* Self-coverage, %= total production (plus 40% of Raspanskaya production) divided by total steel segment consumption
** Self-coverage excl. 40% Raspanskaya share

---

### Cash Cost, Russian Coking Coal

- Cash cost in 2Q-3Q 2010 higher due to fixed cost impact on lower volumes.
- Coking coal self-coverage to increase over the next three years by developing existing deposits and reducing coking coal consumption through the implementation of pulverised coal injection technology.
Iron Ore Mining

- Iron ore production increased from 18.8 million tonnes in 2009 to 19.8 million tonnes in 2010
- Self-coverage in iron ore was maintained at around 100%
- Cash costs increased in line with general cost inflation
- Investment in mine development to maintain or improve self-coverage

**Iron Ore Self-Coverage**

</table>

* Self-coverage, % = total production divided by total steel segment consumption

**Cash Cost, Russian Iron Ore Products**

- Cash costs increased in line with general cost inflation
- Investment in mine development to maintain or improve self-coverage
Vanadium

- Significant improvement in global demand for vanadium
- Acquisition in 2009 of Vanady-Tula, Russia’s largest ferrovanadium producer, signals further expansion of vanadium processing capacity
- Sales of finished vanadium products increased vs. 2009 by 70% to US$492m
- EVRAZ’s vanadium processing capacities are fully utilised

Vanadium Products Revenues* by Region

- Russia & CIS
- Europe
- Americas
- Asia
- Africa & RoW

* External sales
Growth Strategy

Enhancement of raw material base
- Development of a coal deposit in Yerunakovsky region of Kuzbass
- Exploration of the Mezhegey coal deposit
- Increase ‘in-house’ iron ore production and supplementary exploration at existing sites

Increase in steel production volumes
- Reconstruction of 4th converter and 3rd slab machine at NTMK increased crude steel output by up to 0.5 mtpa
- Considering construction of a second converter shop at NTMK with additional crude steel capacity of 1.5-2.0 mtpa
- Expansion of steel capacity in North America by 0.26 mtpa

Strengthening presence in our key markets
- Construction of new rolling facilities in regions where demand is growing (South Russia and Kazakhstan)
- Consolidation of our steel distribution network in the CIS
- Modernisation of rail mills enabling production of high value-added products
- Upgrade of wheel shops
- Considering 50% increase in plate mill capacity at EVRAZ Palini e Bertoli from 0.4 mtpa up to 0.6 mtpa

Cost-saving measures
- Implementation of pulverised coal injection projects at Russian steel mills to eliminate use of natural gas in blast furnaces and reduce consumption of coking coal. Additional effect will be an increase in pig iron production volumes and, therefore, crude steel production
- Implementation of LEAN business principles at all EVRAZ operations
- Conversion of EVRAZ Highveld furnace into open slag bath in order to decrease energy and coking coal consumption
** CAPEX Dynamics **

- Return to investment in modernisation projects and mine development in 2010
- Further growth budgeted for 2011

<table>

Recent Market Developments

- Volumes in key products and markets are stable
- Current steel-making capacity utilisation:
  - Russia and Ukraine - 100%
  - North America - 100%
  - Czech Republic - 70%
  - South Africa - 70%
- Steel prices have stabilised or are increasing
- Iron ore prices have slightly decreased in the recent weeks but are still at levels above 2010 average
- Coking coal concentrate prices in Russia are still holding
- Vanadium prices are at the level of 29 $/kg

Evraz Selling Prices

Source: Metall Expert
Recovery of construction steel product consumption began in 2010

Russian demand for construction steel is expected to be more than 10% higher in 2011 than in 2010

Sources: Rosstat, Metal Courier, Rusmet, Management estimates
The Russian Government plans to spend US$30bn on capital investments in 2011, including US$23bn on construction, thereby significantly impacting demand for construction steel.

Ongoing programmes include:
- New construction related to Sochi 2014
- Infrastructure development for APEC summit in Russian Far East in 2012
- Academic city in Yekaterinburg
- Russian Far East development programme
- Transport system development
- Energy generation plant in Novovoronezh

Confirmed projects expected to start in 2011 include:
- Highway construction between Moscow and St. Petersburg
- Innovations centre at Skolkovo
- Fourth motorway ring around Moscow

Russia has committed to invest $50bn in preparation for the 2018 FIFA World Cup, including $3.8bn on stadiums and $11bn on infrastructure projects. EVRAZ estimates that 2018 World Cup steel requirements for construction of stadiums (13 to be built and 3 to be renovated), hotels and local infrastructure (highways, bridges) may amount to 2-2.5 mt.

As a premier producer of construction products in Russia, EVRAZ is well positioned to benefit from these extensive infrastructure investments.

Sources: Federal Capital Investment Programme, Morgan Stanley
**Outlook**

- High input prices and growing demand should provide support for steel prices across our operations.

- 2Q 2011 EBITDA is expected to be in the range of US$875-950 million.

- Net debt/LTM EBITDA expected in the range of 2.18-2.25 on 30 June 2011 – below the threshold imposed by debt covenants, gives greater flexibility in the execution of Company’s strategic plans.

- EVRAZ is considering listing alternatives to its existing GDR programme.

- Audited 1H 2011 financial results are to be published on or around 12 October 2011.
The markets for our products continues to recover, particularly the Russian construction steel market.

EVRAZ benefits from enhanced steel prices with limited exposure to rising raw material prices.

Much improved liquidity position following refinancing focus in 2010, further deleveraging expected.

Renewed investment in production modernisation and product quality set to bear fruit in 2011 and beyond.

Company now on sound footing to achieve further growth.

Disclaimer

This document does not constitute or form part of and should not be construed as, an offer to sell or issue or the solicitation of an offer to buy or acquire securities of EVRAZ Group S.A. (EVRAZ) or any of its subsidiaries in any jurisdiction or an inducement to enter into investment activity. No part of this document, nor the fact of its distribution, should form the basis of, or be relied on in connection with, any contract or commitment or investment decision whatsoever. No representation, warranty or undertaking, express or implied, is made as to, and no reliance should be placed on, the fairness, accuracy, completeness or correctness of the information or the opinions contained herein. None of EVRAZ or any of its affiliates, advisors or representatives shall have any liability whatsoever (in negligence or otherwise) for any loss howsoever arising from any use of this document or its contents or otherwise arising in connection with the document. This communication is only being distributed to and is only directed at (i) persons who are outside the United Kingdom or (ii) investment professionals falling within Article 19(5) of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005 (the “Order”) or (iii) high net worth companies, and other persons to whom it may lawfully be communicated, falling within Article 49(2)(a) to (d) of the Order (all such persons together being referred to as “relevant persons”). Any person who is not a relevant person should not act or rely on this document or any of its contents.

This document contains “forward-looking statements”, which include all statements other than statements of historical facts, including, without limitation, any statements preceded by, followed by or that include the words “targets”, “believes”, “expects”, “aims”, “intends”, “will”, “may”, “anticipates”, “would”, “could” or similar expressions or the negative thereof. Such forward-looking statements involve known and unknown risks, uncertainties and other important factors beyond EVRAZ’s control that could cause the actual results, performance or achievements of EVRAZ to be materially different from future results, performance or achievements expressed or implied by such forward-looking, including, among others, the achievement of anticipated levels of profitability, growth, cost and synergy of recent acquisitions, the impact of competitive pricing, the ability to obtain necessary regulatory approvals and licenses, the impact of developments in the Russian economic, political and legal environment, volatility in stock markets or in the price of our shares or GDRs, financial risk management and the impact of general business and global economic conditions. Such forward-looking statements are based on numerous assumptions regarding EVRAZ’s present and future business strategies and the environment in which EVRAZ Group S.A. will operate in the future. By their nature, forward-looking statements involve risks and uncertainties because they relate to events and depend on circumstances that may or may not occur in the future. These forward-looking statements speak only as at the date as of which they are made, and EVRAZ expressly disclaims any obligation or undertaking to disseminate any updates or revisions to any forward-looking statements contained herein to reflect any change in EVRAZ’s expectations with regard thereto or any change in events, conditions or circumstances on which any such statements are based.

Neither EVRAZ, nor any of its agents, employees or advisors intends or has any duty or obligation to supplement, amend, update or revise any of the forward-looking statements contained in this document.

The information contained in this document is provided as at the date of this document and is subject to change without notice.
